

SCOPES & MOUNTS

Scope Mounts for 1 inch diameter rifle scopes, made for Theoben by Sportmatch. They are designed for the Rapid Range and all the ultra low recoil break action rifles. They bolt straight on to the rifle so they stay totally fixed. For extra height can be used with high mount adaptors. Note; may not fit pre-1994 Theoben rifles due to size difference.

Raises scope 10 mm

Universal 1 inch High Mount Adaptors. Convert your scope mount to a high mount. Allows up to 56mm scopes to be mounted on a rifle. Fit into the bottom half of existing mount, then with the long screws supplied, the scope and top caps are bolted down in the usual way.

30mm Scope Mounts for 30mm diameter scopes. For larger scopes, adaptor blocks must be used to get sufficient height to clear the front lens of the scope. **30mm High Mount adaptors** are available for this job.

Off-Set Scope Mount (aka reach forward or reach back mount). Use in conjunction with one of the existing mounts. Makes it possible to achieve greater forward or backwards positioning of any scope. Only suitable for Theoben rifles - 1" inch scope.

This one-piece **1" Dovetail Scope Mount** attaches to the grooves in the top of your rifles action by a dovetail clamp arrangement. The majority of air rifles use this system, so this mount can be used for most makes & models.

All types of mounts and mount adaptors always come complete with screws and allen key.

THE DAMPA MOUNT SYSTEM - HOW DOES IT WORK?

Theoben's patented **Dampa Mount** is a unique approach to the problem of unwanted scope movement or indeed scope damage, by using a combination of rubber mounting, coupled with precision guideways to keep your scope perfectly zeroed. It is generally accepted that the two-way recoil produced from a spring piston air rifle will produce extremely high G-forces that act on the rifle scope. In the past, the cures attempted have met with only modest success. Larger mounts, recoil arresting blocks, etc. The main element of Theoben's total success is that the scope is allowed to float just at the moment when recoil happens, then with some clever design the scope recovers completely back to its original position. The important thing is that it has not been subjected to a shock wave that all other scope mount systems transmit. 1" and 30mm tube scopes

PROTECTS RIFLE SCOPES FROM RECOIL

Terry Doe won the 1993 British Spring Gun Championship with a Dampa Mount. Quote from Terry; "From now on when I use a recoiling rifle, I'll always use a Dampa Mount"

NO more broken crosshairs!
NO more scope creep!
NO more zero shift!

Made for Theoben by British Sports Match

RECOMMENDED BY

Two versions of this scope mounting system are available, suitable for all recoiling rifles especially high power (FAC) and many 12ft/lbs air rifles; the **Theoben Dampa Mount** for our own models, and a (non-Theoben) **Dovetail Dampa Mount** suitable for 11-13mm dovetail grooves including; AIR ARMS, BSA, DIANA, FEINWERKBAU, ORIGINAL, RWS, WEBLEY, WEIHRACH. Fits up to 50mm (except parallax correcting) lens scopes.

***** 30mm Dampa Mount available from Autumn 2004 *****
***** ONLY AVAILABLE FROM THEOBEN *****

Please specify type required: Theoben or Dovetail Dampa Mount
size required: 1 inch or 30mm diameter scope tube

We stock a limited number of quality scopes from the following top manufacturers.

We can special order any model of scope from above manufacturers (on high-end scopes a deposit may be required).

We can advise you on the best scope for the job depending on your requirements. Prices range from around £50 for a basic entry level scope and just keep going up.

We have listed a few popular models in four price brackets with a variety of magnifications and features ranging from; Special Coated Lenses, Waterproof, Shockproof, Fogproof, AO - Parallax Adjustable, Rangefinder, Low light shooting situations, target shooting and hunting.
