

FENMAN

12ft/lbs energy from our patented
H.E Gas Ram System

12ft/lbs in .177, .20, .22 calibres

OUTSTANDING
ACCURACY

1/2" Group at 40 yards

Fenman with Vortex Silencer and Scope

Theoben are now through their second decade of air rifle manufacturing. Over the years the rifles have lead the way in reliability, power and accuracy. The H.E. gas ram system allows low cocking effort and low recoil with no maintenance required. The Theoben system is held in such high esteem that we have successfully licenced a German air rifle manufacturer to also gain the benefit of the English advancement. Gone are the days when the shooter had to put up with noise, vibration and power variation of the old fashioned coil spring. The gas ram system has come of age with almost twenty years track record to prove this.

Forget your greasy old coil spring rifles - Go with modern technology

- ⊕ Lowest recoil ever achieved. Almost no felt recoil at all.
- ⊕ Light weight - around 3.6kg (7.9lbs) unscoped
- ⊕ Ultra short, but accuracy is not sacrificed
 - 94 cm (37") Evolution Silencer
 - 97 cm (38") Vortex Silencer
- ⊕ Fitted with an ambidextrous stock suited for right and left hand shooters. Stippled pistol grip and fore end and a ventilated recoil pad.
- ⊕ Theoben Evolution trigger fitted. Adjustable 2 stage trigger down to 1½ lbs pull and automatic safety catch.
- ⊕ The Fenman requires mounts to enable a scope to be fitted. These screw onto to action, this gives perfect scope alignment and guaranteed not to let the scope shift and loose zero. Mounts available for both 1" and 30mm scopes.
- ⊕ The .177 and .22 calibres are fitted with Anschütz barrels and the .20 calibre is fitted with Walther barrels, both types are high quality and they are choked so accuracy is guaranteed.
- ⊕ The Fenman is designed to shoot a wide selection of quality pellets - H&N Field Target Trophy, RWS Superdome, Crosman Premier - all within the UK legal limit 12 ft/lbs energy.

Fenman with Evolution Silencer and Scope

- ⊕ The H.E. system makes for easy loading by cocking the barrel. The silencer is used a cocking aid so it can be loaded by virtually anybody.
- ⊕ The rifle is finished to the usual high standard of polished and blued steel. Experience has shown that Theoben rifles hardly loses value over time if they are kept in good condition.

The Fenman can be fitted with either the Evolution or Vortex silencers or a barrel weight if preferred.

**Break Barrel Air Rifle -- .177, .20, .22 calibres -- Theoben H.E. Gas Ram System
Light Weight -- No Recharging -- Low Recoil -- Low Maintenance**

Optional Extras; Gun Bag, 30mm Scope Mounts, Scope, Pellets. Also see accessories pages.
