

WEIHRAUCH HW90 TB

BUILT IN GERMANY WITH THE THEOBEN GAS RAM SYSTEM

12ft/lbs in .177 & .22 calibres

HW90 TB fitted with a Walnut stock, silencer & Simmons Scope

Low Maintenance
Patented Theoben Gas Ram System
Power is unchanging for thousands of rounds

Weihrauch gets the Theoben System and a Walnut Stock

Theoben have decided to make a stylish improvement to the standard HW90. Walnut gives beauty yet weighs less than a beech stock, as fitted to the standard version of the rifle. We have restyled the wood around the trigger safety and slimmed down the fore end to make an elegant improvement. A carbine barrel/silencer makes this a very versatile rifle. The vast improvement in consistency and recoil over previous spring powered Weihrauch models is due thanks to English technology.

Specifications

- ✦ Break Barrel Air Rifle
