

THE MID POWER FAC RIFLES

15 - 22 ft/lbs H.E. Gas Ram System

OUTSTANDING ACCURACY

½ Group at 50 yards

.22 cal up to 22 ft/lbs - .20 cal up to 18 ft/lbs - .177 cal up to 15 ft/lbs

Nearing 20 years experience using the Gas Ram with many thousands of rifles giving excellent service world wide, Theoben have created a family of rifles that are ideal for vermin control. Many situations need the right amount of power to reach longer distances than a 12 ft/lbs is capable of but not over kill that a 30 or 40 ft/lbs rifle can produce. Long range target shooting is a real joy when seemingly almost impossible shots are made and taken with total confidence. The combination of Anschütz barrels, British quality engineering, Simmons scopes and high quality pellets give high powered air rifles a new meaning when it comes to vermin control.

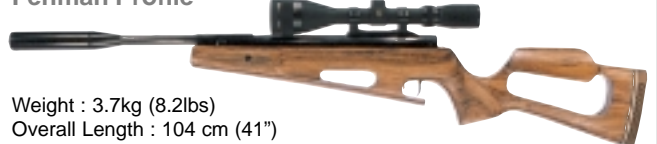

Forget your greasy old coil spring rifles - Go with modern technology

Fenman

Weight : 3.6kg (7.9lbs)
Overall Length : 100 cm (39.5")
Barrel Length : 25.4cm (10")
Ambidextrous Hyedua Stock with a neutral cheek piece and a stippled pistol grip and fore-end

Fenman Profile

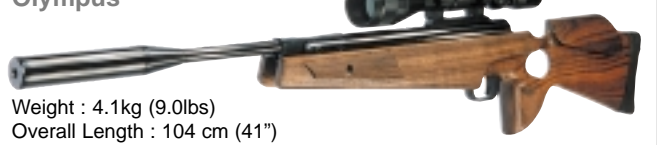

Weight : 3.7kg (8.2lbs)
Overall Length : 104 cm (41")
Barrel Length : 25.4cm (10")
Left or Right hand Hyedua Stock with integral trigger guard and fully chequered pistol grip and forend

Taurus

Weight : 3.8kg (8.0lbs)
Overall Length : 104 cm (41")
Barrel Length : 25.4cm (10")
Left or Right hand Hyedua Stock with sharply contoured roll-over cheek piece and fully chequered pistol grip and forend

Olympus

Weight : 4.1kg (9.0lbs)
Overall Length : 104 cm (41")
Barrel Length : 25.4cm (10")
Left or Right hand, thumb hole Hyedua Stock with fully chequered pistol grip and forend. Perhaps more suited to target shooting.

Sirocco 'HV'

Weight : 3.6kg (7.9lbs)
Overall Length : 109 cm (43")
Barrel Length : 25.4cm (10")
Fitted with the 'Trans-Port' silencer
Left or Right hand Hyedua Stock with a chequered pistol grip and forend

THE SECRET OF THEIR SUCCESS

Break Barrel Air Rifle - .177, .20, .22 calibres
Theoben H.E. Gas Ram System
No Recharging - Low Recoil - No Maintenance

The Evolution Silencer is fitted as standard to all this range of rifles, except the new Sirocco 'HV' which is fitted with its own 'Trans-Port' Silencer. Barrel weights can be fitted to any of these rifles if your country's law does not permit the use of silencers or sound moderators. The power system - Theoben's Patented Gas Ram - makes very little noise so it is logical that the muzzle noise should be minimised. This is achieved by our multi baffled, large capacity Evolution Silencer. Made strong enough to use as a cocking aid but not heavy enough to upset the balance.

Theoben are now over half way through their second decade of air rifle manufacturing. Over the years the rifles have lead the way in reliability, power and accuracy. The H.E. gas ram system allows low cocking effort and low recoil with no maintenance required. Gone are the days when the shooter had to put up with noise, vibration and power variation of the old fashioned coil spring.

Optional Extras; Gun Bag, 30mm Scope Mounts, Simmons Scope, Pellets. Also see accessories pages.

These rifles can be fitted with either the Evolution or Vortex silencers or a barrel weight if preferred.

	12ft/lbs	FAC
<i>Discontinued</i>		

Dampa Mounts are recommended on FAC powered air Rifles.
