

## Sirocco 2000 and 'Trans-Port Diffuser' Silencer

OUTSTANDING  
ACCURACY

12 mm group at 37 metres  
(1/2" Group at 40 yards)

12ft/lbs energy from our  
patented Gas Spring

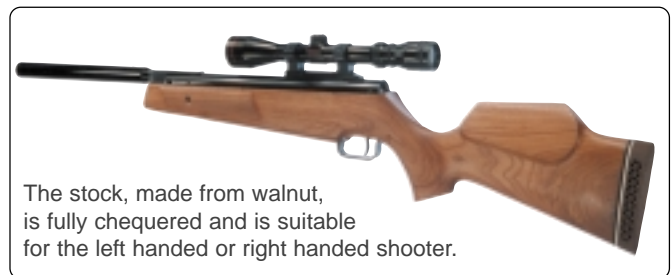

### Forget your greasy old coil spring rifles - Go with modern technology

It is a self contained, break barrel action combined with a gas spring power unit that uses a lightweight piston with floating inertia weight plus patented Zephyr piston crown seal. This adds up to our growing generation of H.E. system rifles giving consistently low recoil plus accuracy other spring type rifles can only dream about. As with all Theoben break barrel rifles, it is a no maintenance system.

#### Specifications

- |                          |                                  |
|--------------------------|----------------------------------|
| ⊕ Break Barrel           | ⊕ .177, .20, .22 calibres        |
| ⊕ 12 ft/lbs              | ⊕ H.E. Gas Ram System            |
| ⊕ Length : 100cm (39½")  | ⊕ 'Trans-Port Diffuser' Silencer |
| ⊕ Weight : 3.1kg (6.9lb) | ⊕ Evolution Trigger              |
| ⊕ Low Recoil             | ⊕ Automatic Safety Catch         |
| ⊕ No Maintenance         | ⊕ Ambidextrous Walnut Stock      |
| ⊕ No Recharging          | ⊕ Dovetail Scope Mount System    |

Our well proven Evolution trigger mechanism, as featured in our other break barrel rifles, is based around the falling block system. It is a fully 2 stage unit with adjustment for second stage weight and travel. It also features an automatic safety catch.

The stock, made from walnut, is fully chequered and is suitable for the left handed or right handed shooter.

The Theoben gas spring system is good for tens of thousands of shots, with no change of power, unlike a coil spring that weakens from day one, so you can leave the rifle cocked for as long as you like with no worries about it wearing out or loss of power over time.

➔ For current prices of all accessories and our full range of rifles see the Retail Price List ➔

The Sirocco 2000 now has grooves machined in the action to accept dovetail scope mounts or Dampa mount. This gives perfect scope alignment.

Theoben recommend  
Simmons Scopes

Fitted with a 19cm (7½") ultra carbine Anschütz barrel in .177 and .22 calibres and selected Walther barrels in .20 calibre and the new 'Trans-Port Diffuser' silencer. This silencer has two sets of diffusing holes around the front and rear. The whole silencer length is hollow, allowing for maximum dispersal of the air blast.

### The air rifle system that is *always* ready to shoot
