

TAUNUS

H.E Gas Ram System

OUTSTANDING
ACCURACY

1/2" Group at 40 yards

Taunus with Evolution Silencer and Simmons Scope

Forget your greasy old coil spring rifles - Go with modern technology

Following the outstanding success of the Fenman sporting air rifle, Theoben have re-developed the previous 'Sirocco Classic' model and called it the Taunus. Luxury specification and right up to the 12ft/lbs limit. Fitted with the best trigger yet from Theoben.

It's a break barrel action with precision adjustable lock up combined with a gas spring power unit that uses a lightweight piston with floating inertia weight plus patented Zephyr piston crown seal. This adds up to our H.E. system giving consistently low recoil & accuracy other spring type rifles can only dream about.

Anschütz barrels are used in .177 and .22 and selected Walther barrels are used in .20 calibre. The stock is made from African hardwood called hyedua (*shed-u-a*), extremely pleasing to the eye and completely stable in use. All unwanted weight has been machined away to leave you with an elegant, attractive sporting stock with a whole range of features unique to the Taunus.

The Evolution trigger mechanism is based around a falling block system. It is a fully 2 stage unit with adjustment for second stage weight and travel. It also has an automatic safety catch.

The scope mount system is our rigid two piece set up which bolts into a fixed ramp, so no creep or loss of zero. A Dampa Mount is available for the FAC version, but unnecessary for 12ft/lbs on this low recoil rifle it would not be of any benefit.

This rifle is designed to shoot the lightweight Hobby pellets through to the heavy Barracudas all up to the UK legal limit of 12 ft/lbs energy. Theoben make the only piston rifles to achieve this.

	12ft/lbs	FAC
<i>Discontinued</i>		

Dampa Mounts are recommended on FAC powered air Rifles.

Optional Extras; Gun Bag, 30mm Scope Mounts, Simmons Scope, Pellets. Also see accessories pages.
