

Rapid MFR Pre-Charged Pneumatic

.177, .20, .22 & .25 calibres
 12ft/lbs & FAC

Based on our award winning Rapid 7 action and using a combination of the latest technology and computerised engineering methods, together with our vast experience in pre-charged pneumatics we are delighted to introduce the **Rapid MFR**.

The extended forend of the walnut stock gives your leading hand a comfortable place to support the rifle 'up in the aim', so you do not have to hold the buddy bottle. Also available with a right hand CS800 thumbhole stock.

The full length, integral silencer gives the look of a bull barrel. Its purpose is to disperse the air down the full length of the barrel, causing the sound to dissipate. This makes the silencer exceptionally quiet. For extra silencing, there is an MFR silencer which attaches directly onto the end of the integral silencer.

The loading port has been scalloped to allow three methods of loading; manual loading direct into the breech, using the single shot holder (supplied) and finally using one of our patented multi-shot magazines.

The 12ft/lbs regulator has been extensively worked on and is much more consistent than previous versions. With this much improved airflow it has given us the chance to go back to a 280cc bottle giving the rifle a slimmer look but keeping a very high number of shots per charge.

.25 calibre	.22 calibre	.20 calibre	.177 calibre
30 ft/lbs	28 ft/lbs	24 ft/lbs	19 ft/lbs
60 shots	60 shots	60 shots	60 shots
12 ft/lbs	12 ft/lbs	12 ft/lbs	12 ft/lbs
n/a	300 shots	260 shots	220 shots

Max energy & shots per charge from a 280cc bottle filled to 232 bar (3200 psi).

The trigger cartridge was computer modelled and designed. This fully adjustable two stage match grade trigger can easily be removed. The safety catch is manually set and the pull is comfortable in any shooting situation, though a trigger shoe can be fitted if preferred. (Optional FT straight-bladed pull also available).

Specifications

- ⊕ .177, .20, .22, (.25 FAC only) cals
- ⊕ 12ft/lbs (regulated) and FAC
- ⊕ Bolt action pre-charged pneumatic
- ⊕ Single Shot or Magazine Fed
- ⊕ High Quality German Barrel
- ⊕ Walnut Sporter Stock
- ⊕ Adjustable Match Grade Trigger
- ⊕ Recoilless

	12ft/lbs	FAC
⊕ Barrel Length:	400mm (16")	530mm (21")
⊕ Overall Length:	980 mm (38½")	1110mm (43½")
⊕ Weight unscoped:	3.2Kg (7.2lbs)	3.4Kg (7.6lbs)

The Rapid MFR can be fitted with any one of our patented 7, 12 or 17 shot magazines.

Top: Shows loading the MFR using the single shot holder supplied.

Below: Shows the single shot holder in place ready to load in pellet.

Supplied with; 1" mounts, single shot holder, 280cc bottle, fully length integral silencer and right hand walnut stock.
Optional extras; 7, 12 or 17 shot magazines (depending on calibre), CS800 thumbhole stock, MFR Silencer, 30mm mounts.
