- ✦ Weight: 4.3kg (9.4lbs) without scope
- ✦ Length: 1098mm (43")
- ✦ 1 1/2" group @ 70 yards

Features

Our new design of regulator (pat pend) is fitted to all 12ft/lbs versions. The FACs are fitted with our 'fast-flow' adaptor and have enlarged 'thru-porting'. These new and improved features have increased the shots per charge available from a 400cc bottle by 50% compared to the original Rapid MkI 17/17 FT. The shot to shot consistency is also improved - the shot variation is down to an amazing $\pm 1\%$.

Fitted with the superb two-stage Match Trigger with a manual safety catch. It also features a .177 calibre Anschutz barrel, which is precision choked to ensure that the Rapid continues to be the most accurate PCP on the market today.

A brand new, beech laminate, field target stock has been designed for this rifle. It has an integral trigger guard, adjustable recoil pad, the pistol grip and forend are stippled for comfort and grip. And as with the MkII sporter stock, the forend is shaped so the flowing lines make a smooth transition with the buddy bottle.

Other features include; larger bolt handle with o-ring grip for easier use, our patented 17 shot magazine is supplied as standard, as too is the 'whisper quiet' Vortex Silencer. Export versions to countries that do not allow silencers will be fitted with a barrel weight instead of a silencer.
